Education

KLH University *Artificial Intelligence and Data sciences in Computer Science* *June 2023 – May 2027*

- GPA: 9.18/10.0
- **Coursework:** Artificial Intelligences, Deep learning, Data Analysis and Visualization
- **Honors:** Honors with Research and Methodology

Publications

A Review and Potential Gaps in News Article classification *Aug 2025*
Sunkara Naga Sai Ram Vivek, Botsa Kishore Kumar

Projects

Custom Gesture Controller — Computer Vision *Sep 2025*

- Designed and developed a customizable gesture control system that allows users to map hand gestures to personalized system commands and application-specific actions.
- Implemented gesture-based automation features to perform system actions (e.g., cursor movement, media control, and application navigation), improving user interaction through an intuitive human-computer interface.

Auditex AI-Forensic Video Speech Intelligence System— MERN, Whisper *Dec 2025*

- Built a video speech intelligence system using Whisper for speech-to-text, Pyannote for speaker diarization, FFmpeg for audio extraction, and Transformer models for summarization, generating accurate transcripts and speaker-wise conversations.
- Developed a MERN + Python pipeline with automated audio processing, real-time analysis, secure data storage, and multi-format exports to support forensic, legal, academic, and interview video documentation.

Public Transport System — Python, Django *Sep - Oct 2024*

- The app takes input for current and destination locations, displaying costs for Rapido, Ola, Uber, and local buses. It provides detailed bus information when the local bus option is selected.
- This project makes it easier for foreign visitors to use local buses and metro systems, improving their travel experience and encouraging the use of public transportation.

Technologies

Languages: C++, C, Java, C, SQL, JavaScript, Python

Technologies: Django, Tableau, Flutter, MERN Stack, Github, Open CV

Core CS Concepts: Database Management System, Data Structures and Algorithms, Operating Systems, Data Analysis And Visualization

Libraries : PyTorch, TensorFlow, Matplotlib

Certification

-
- Programming in Modern C++ (NPTEL)
 - Participation Certificate in Blind Coding Contest, KLH
 - GitHub Foundation Certificate

Achievement

Winner – Impact Hackathon, KLH 2025
