Career Objective

B.Tech student in AI & Data Science with hands-on experience in Data Engineering, Full-Stack Development, and Cloud(AWS). AWS Certified Data Engineer Associate with practical experience building scalable ETL pipelines, AI powered applications, and secure cloud-native systems. Skilled in Python, SQL, MERN, AWS, and Machine Learning with proven success in hackathons and internships.

Education

2023 – Present	B.Tech in AI and Data Science , KLH University	CGPA: 9.1
2021 – 2023	Telangana State Board of Intermediate Education	Marks: 779/1000

Technical Skills

Programming & CS	Python, Java, C, DSA, OOP
Software Development	REST APIs, Microservices Basics, MERN Stack, Django, System Design, CI/CD
Data & AI	Machine Learning, Deep Learning, Natural Language Processing, Data Science, Statistics, Snow Flake, TensorFlow
Cloud & Tools	Tableau, SQL, MongoDB, ETL & ELT Pipelines, AWS, Salesforce, GitHub

Work Experience

Data Engineering Full Stack Developer Intern, FastIOT	Jan 2025 – May 2025
– Designed and implemented scalable ETL pipelines for cellular tower data. – Reduced data processing latency upto 40% by optimizing pipeline architecture. – Secured backend systems using TLS-based authentication, ensuring data integrity. – Developed a MERN-based monitoring dashboard to track pipeline health and system performance.	

Projects

Fisher Watch - Secure Telecom Data Monitoring Platform	GitHub
– Independently designed and developed a secure end to end tower data management platform using MERN to detect rogue and misconfigured cell towers. – Built a complete data pipeline handling ingestion from IMSI catchers and data preprocessing – Implemented mutual TLS authentication for secure access and developed interactive dashboards.	
CampusStream – AI Powered Educational Video Platform	GitHub
– Developed a full-stack campus video streaming platform enabling secure content upload, structured academic organization, and collaborative learning. – Integrated Google Cloud Speech-to-Text and Gemini AI to enable automatic transcription, context-aware chatbot interaction, and AI-powered video summarization.	
Appointment Guru - AI Enabled Healthcare Appointment Platform	GitHub
– Developed a full-stack doctor appointment booking platform using Django and SQLite. – Integrated BMI calculator, nutrition recommender, and insurance premium prediction modules. – Added an conversational AI chatbot (SymptoSage) for preliminary symptom analysis.	

Global Certifications

- AWS Certified Data Engineer - Associate
- AWS Certified Cloud Practitioner
- GitHub Foundations
- Salesforce Certified AgentForce Specialist

Achievements

- **Vibe-AI-Thon 2025 – 3rd Place** (AI Agent Development)
- **Impactech Hackathon 2025 – 2nd Place** (AI Chatbot Solution)
